***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, 20-21, drawn to a method for quantifying prebiotic activity of a fiber or substance.

Group II, claim(s) 15, drawn to a method for designing a composition containing a prebiotic.

Group III, claim(s) 16-18, drawn to a system for designing a composition.

Group IV, claim(s) 19, drawn to a composition.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature is quantifying a prebiotic substance on the growth, modification, fermentation or assimilation by a bacterial population.

Smiricky-Tjardes (J Animal Science) entitled "Dietary Galactooligosaccharides Affect Ileal and Total Tract Nutrient Digestibility, Ileal and Fecal Bacterial Concentrations, and Ileal Fermentative Characteristics of Growing Pigs" teaches in the abstract, ileal digest samples were collected and various prebiotics were fermented in vitro and analyzed for different products and growth of target microorganisms.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
